

To whom it may concern,

I think a vaccine passport is an unnecessary request. The vaccinated can spread, carry and contract the COVID virus the same as anyone else. How will restricting people who have valid reasons for not getting the vaccine to not be allowed to go into facilities in the area without one?

If a passport I needed how will you ensure people are keeping up on the vaccines? How will you ensure there is someone to monitor the passports as people enter the stores? There are already issues with stores being short staffed, and now you are going to make someone check everyone as they enter the store/restaurant?

The science is not behind needing this, and other states who are opening back up are proving we can get back to a better quality of life without excluding anyone from the freedom to move around.

Please do not vote to approve a vaccine passport.

Respectfully,

 Sandy Lane
